Henny Penny Replacement Basket Rest for OFE 321 Open Fryers

Topic: The basket rest on older style OFE 321 open fryers becomes weak and is prone to break off. Until recently, the only option was to have it welded back which was expensive and not ideal.

Solution: The new basket rest is designed to fit directly on top of the current rest area and can be installed using a screwdriver.

- Fryers made before April 2006: Order part# 140136 (slant deck)
Fryers made after April 2006: Order part# 140124 (flat deck)
- Verify the age of the open fryer by using one of the two following methods:
 - Reference the [Serial Number Key](#) on @CFA.
 - Provide Big A with the serial number when you call to order.
- Advantages when using the new basket rest:
 - Increased durability
 - Eliminates welding of old bracket
- Purchase of the new basket rest is a restaurant P&L expense.
- **You can order the new rest from Big A distributors (800-222-0298 ext. 5)**

Call the [Facilities & Equipment Support Line](#) at 404.765.8998 with any questions or concerns.
